

Titre de la session spéciale :

Business logistics in digital world

Organisateur :

- **A. BURINSKIENE**, *Vilnius Gediminas technical university (Lithuania)*

Descriptif :

Digitization has touched upon all aspects of logistics and operating models. Today, technologies such as RFID, GPS, and sensors have enabled organizations to transform their existing hybrid (combination of paper-based and IT-supported processes) logistics structures into more flexible, open, agile, and collaborative digital models. Unlike hybrid logistics networks, which have resulted in rigid organizational structures, inaccessible data, and fragmented relationships with partners, also e-logistics with business process automation and digital data management in real time important as well.

Thèmes:

- Axe 3 - Supply chain management (SCM)
- Axe 4 - Processus logistiques
- Axe 7 - Logistique et Technologies d'information
